The Protoblock mobile apps provide a convenient way to play the Projections Game and an easy access to fantasy data.

- Account
- Projections
- Leaderboard
- NFL News

Introduction

The Protoblock Desktop apps are full-feature dashboard nodes. In addition to mobile functionality, desktop apps provide:

- Wallet
- Block Explorer
- Trading
- Chat

Claim Your Name

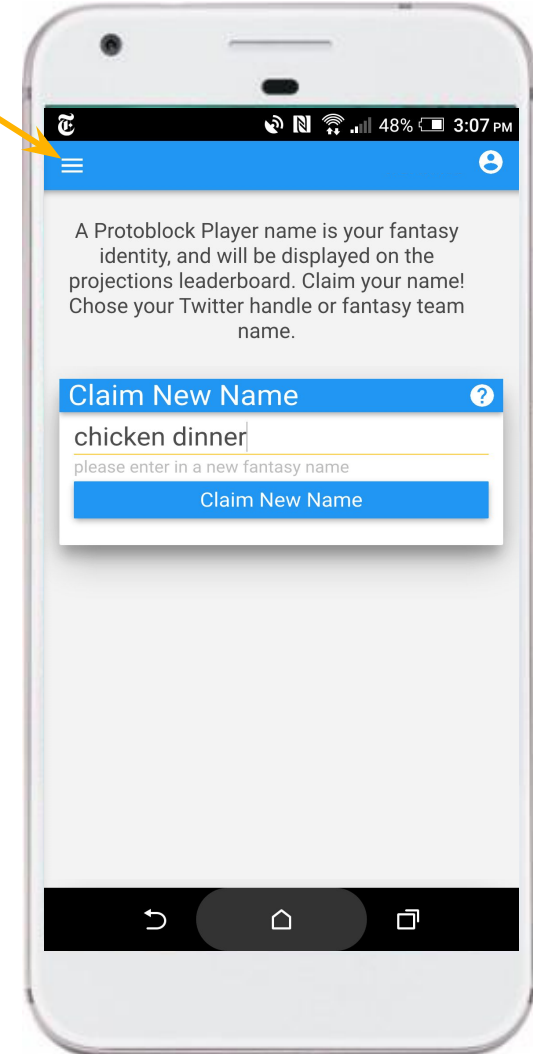

New Users – claim a new name

1. Use Menu to access Account
2. Enter a new name
3. Write down the 12-word secret & keep it in a safe place (do not screenshot or save on the computer for security purposes)

Existing Users – import name to new device

1. Use Menu to access Import-Export
2. Find your written-down 12-word secret or export from old device
3. Enter 12-word secret under 'Import'

MENU

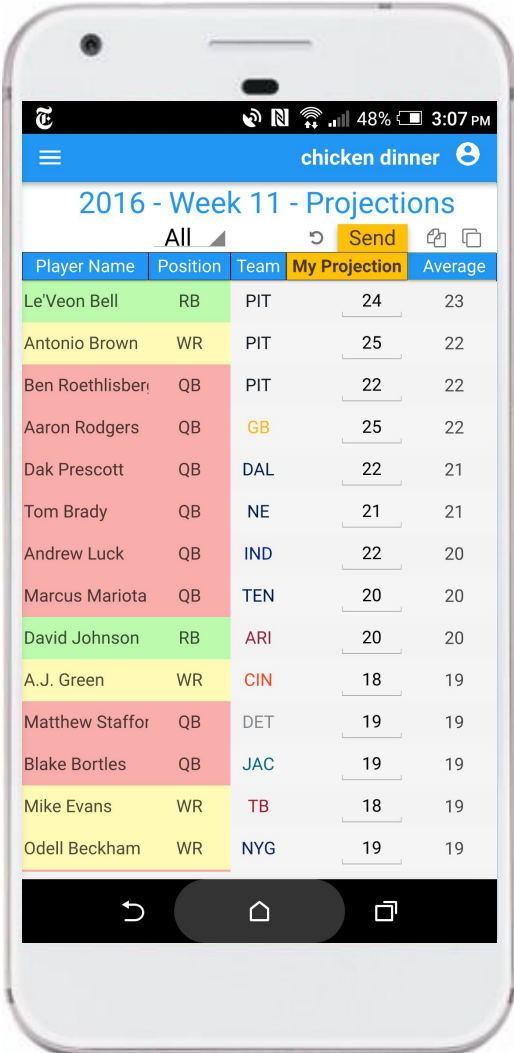

Projections Game

Available NFL Season Week 1 through 16

Each week prior to kickoff, Protoblock players compete by making direct projections for any/all NFL players. It's free to play. There's no drafting and each week is a new game.

As each NFL game is scored, 100 FBs are generated for every PPR fantasy point (1 PPR=100 FB) and automatically distributed to Protoblock Players based on projection accuracy.

It's easy to earn FBs, but only real NFL fantasy experts can rise up the Leaderboard with consistent skilled projections.

2016 - Week 11 - Projections

Player Name	Position	Team	My Projection	Average
Le'Veon Bell	RB	PIT	24	23

The screenshot displays the 'Projections' web application interface for the NFL Season 2016 - Week 14 Live. The interface is divided into three main sections: Schedule, My Projections, and Leaderboard.

Schedule: This section shows a list of games for the week. The table includes columns for Time, Away, Home, Status, Player Name, Position, Team, Roster, My Projection, Average, and FantasyData.com. Games are listed for Thursday (8:25) and Sunday (1:00).

My Projections: This section allows users to review and update their picks. It includes a 'Send' button and a 'FantasyData.com' link.

Leaderboard: This section displays a list of players and their performance metrics. The table includes columns for Fantasy Name, Block, Count, and wk1.

Navigation: The top navigation bar includes links for PROJECTIONS, TRADING, NFL NEWS, ACCOUNT, and PROTOBLOCK. The user's name 'chicken dinner' is displayed in the top right corner.

Trading Game Overview

Protoblock trading game is available on the desktop app.

You can use **FBs** to play leveraged positions on individual NFL players' PPR scoring for each week (through week 16) directly with other Protoblock players.

Use the Trading dashboard to review market activity, make orders, and track your positions.

Trading Game Overview

Sell Overrated Players

If you believe a specific NFL player is overrated you can sell or 'short' a player and earn 100 FBs for every PPR point result under the strike price.

Buy Underrated Players

If an NFL player is underrated you can Buy or 'long' a player and earn 100 FBs per every PPR point result over the contract price.

Market Depth for Trading

The Market Depth for each player shows open contract orders for buying and selling. In the example here for Jeremy Maclin, it shows the market will buy at 9 and sell at 12.

A Buy order at 7 would go unfilled until another matching bid comes in, adding to the market depth.

A new Buy order at 12 would be executed immediately and remove market depth as the order is fulfilled.

2016 Week 14 Contract			
 Jeremy Maclin (WR) - 1346			
Market Depth			
Bid Size	Bid Price	Ask Price	Ask Size
1	9	12	1
		25	10

This market depth for Jeremy Maclin shows immediately actionable bids would be a Buy at 12 or a Sell at 9.

Placing Trade Orders

Set Order Price & Quantity

Each trading contract is set at 100 FBs per fantasy point result.

Payout happens automatically when each NFL game/player is scored.

For a Buy strike price of 12:
15 point result would earn 300 FBs
10 point result would lose 200 FBs

2016 Week 14 Contract			
 Jeremy Maclin (WR) - 1346			
Market Depth			
Bid Size	Bid Price	Ask Price	Ask Size
1	9	12	1
		25	10

Buy Price: <input type="text" value="12"/> expected fantasy points	Sell Price: <input type="text" value="40"/> expected fantasy points
Buy Qty: <input type="text" value="1"/> number of contracts	Sell Qty: <input type="text" value="1"/> number of contracts
<input type="button" value="Buy"/>	<input type="button" value="Sell"/>

My Trading Positions

Executed Orders/Contracts show as active My Positions in the Trading dashboard.

The Market Depth is used to calculate a dynamic PnL estimate based on exercising open orders. In this example it shows -300 PnL because you could instantly sell at 9 and take a 3 point loss (-300FBs).

Ticker

@Prototicker

Each executed Trading contract generates a Twitter tweet-tick on the [@prototicker](#) feed with dynamic alerts of trading NFL player market prices.

You can access Prototicker data feeds in the NFL News/Twitter section of the apps or at problock.com/ticker
